Professional Experience

- **Infosys Limited - Loreal USA** — Hybrid
  Data Engineer — *February 2020 - July 2022*
  - **Responsibilities**: To enable data modeling and multigrain insights on sales and ads running on e-commerce portal
  - **Goals Achieved**:
    - Built High scalable 4 layer architecture(raw, curated, semantic & Consumption) to handle huge workloads effectively
    - Developed and maintained data pipelines and analytics solutions on GCP to warehouse data efficiently.
    - Created data models and implemented automated data validation checks to ensure data quality.
    - Worked with SQL and NoSQL databases to query dataset and analyze data.
    - Created data scraping tool with Flask and Pandas to scrape data across websites which reduced manual efforts by 70%.
    - Achieved metadata driven composer(Airflow) data pipelines to orchestrate data pipelines to perform ETL operations.
    - Created automated scripts/code controlled by GCP cloud functions to monitor daily file loading improving efficiency and reducing processing time by 60% for internal reporting
    - Worked with business stakeholders to identify and understand key performance indicators, and created data models to support business needs.
- **Paloalto Soft** — Remote
  Firmware Developer — *November 2018 - January 2020*
  - **Responsibilities**: Development of smart home automation devices based real-time sensors and user control
  - **Goals Achieved**:
    - Designed, developed, and maintained firmware for home automation devices, including smart locks, thermostats, and security systems.
    - Worked with wireless communication protocols such as Wi-Fi, Zigbee, and Bluetooth, to ensure seamless connectivity between devices and mobile applications.
    - Implemented firmware updates and bug fixes, and conducted thorough testing and validation to ensure high quality and reliability of the firmware.
    - Designed and developed firmware for smart home lighting systems, including drivers for various lighting components and integration with voice assistants such as Amazon Alexa and Google Home.
    - Worked on CI/CD pipelines with GCP cloud build to automate deployment process which saves 90% of production deployment time.

Projects

- **CNN based body rash prediction application with AR technology**: (Work in progress) Research oriented, open source Body rash prediction application to detect and predict type of rash upon scanning the image. It gives us high level analysis and suggests necessary precautions to take before consulting a medical practitioner which saves 50% time and money.
  Tech: Python, opencv,TensorFlow,keras.
- **Cloud based Serverless ETL architecture**: (Work in progress) Severless model gives us high flexibility in scaling and maintaining workload by reducing 60% overall cost for an ETL/ELT data pipelines. With this opensource application architecture, one can deploy on any cloud with their respective services with ease and comfort.
  Tech: Python, GCP cloud, AWS cloud, DBT, FLASK, docker
- **SanFrancisco Crime Data Anlytics**: A Tableau powered analytics dashboard for public crime data, offering citywide crime insights and status summaries. Utilized visualizations, including maps and charts, to convey key crime trends and patterns, facilitating data-driven decision-making.
  Tech: Tableau, Bigquery, DBT, RESTful API, Flask, Apache Airflow (September '23)

Skills Summary

Languages : Python, SQL, C++, Embedded C
Frameworks : Data Build Tool (DBT), Flask, pyspark
Tools : Docker, GitLab, PostgreSQL, Snowflake, Apache Airflow, Cloud Data Products
Platforms : GCP, AWS, Linux, Windows, Raspberry Pi
Reporting Tools : Google Data Studio, Tableau, PowerBI
Soft Skills : Decision Making, Problem Solving, Team management

Education

- **California State University, Eastbay** — Hayward, CA
  Master of Science in Statistics and Data Science — *August 2022 - April 2024*
- **Jawaharlal Nehru Technological University** — Kakinada, India
  Bachelor of Technology in Electronics and computer Engineering — *July 2015 - April 2019*
